

Sat., September 14, 2019

8:00 am - 2:00 pm

Sign-in begins at 7:30 am

TPC Michigan Golf Club

One Nicklaus Drive

Dearborn, MI 48120

**CME
AVAILABLE**

This event is designed to be of interest to all healthcare providers eager to learn more about the role of genetics in cancer prevention and treatment

After attending this activity, participants will understand and/or be able to implement:

- The importance of identifying individuals at increased risk of hereditary cancer
- How to differentiate between individuals at high versus average risk of hereditary cancer in order to promote the most appropriate utilization of genetic services
- Strategies to connect patients to genetic services
- Best practices related to the integration and management of cancer genetics into clinical practice

Genes and Cancer Risk: Opportunities for Prevention
